

SOUTH OSBORNE ROAD WATER MAIN REPLACEMENT PROJECT UPDATE

Project Status:

WSSC Water construction contractor, Spiniello, is installing a 30-inch diameter water main along South Osborne Road (near Woodyard Road).

This new 30-inch water main replaces an existing aging pipe that is getting close to its life expectancy.

Completed Work:

Spiniello has installed the following water mains: 8-inch diameter near Carrol Court, 12-inch diameter from 7000 South Osborne Road to 7625 Crain Highway/Route 301, and one mile of 30-inch diameter from 6704 to 7605 South Osborne Road.

Work Remaining:

1 1/3 miles of 30-inch diameter water main, large diameter valve vaults, by-pass valve, and test stations for pipe corrosion protection.

What to Expect:

Temporary roadway restoration is currently being completed. Permanent road surface restoration will occur when all utility work is completed and will include a full depth mill and overlay of the asphalt roadway from curb to curb.
